Dementia Research: A Focus on Brain Health

Join us for this free, live virtual event featuring special guest Dr. Rebecca Edelmayer, director of scientific engagement for the Alzheimer's Association and Dr. Kevin Groom, clinical neuropsychologist for the Anchor Clinic.Topics Include:

- Latest advancements in local, national and global research
- Dementia risk factors and brain health
- Clinical trials and how they work
- Virtual Brain Bus program

TO REGISTER: https://primetime.bluejeans.com/a2m/register/xvqdcukb

CALLING ALL CAREGIVERS:

We have an opportunity until June 30th (cut off date for signing up) for current caregivers: The Alzheimer's Association recently partnered with the University of Florida to examine if electronically delivered caregiver materials are useful for caregivers. This is a research project focusing on caregiver educational platforms. It will not cost you anything and also has a \$50 honorarium. If you are interested in participating or learning more about the study, please let me know. I love that they use references from Teepa Snow and focus on caregiver wellness. Topics include: Personal Care, Brain Health and Safety & Injury Prevention. Modules are self-paced.

Basic requirements:

- 1. Do you have high speed internet access?
- 2. Do you have an available device, such as a smartphone, tablet, laptop, or desktop that you are comfortable using?
- 3. Are you at least 18 years old?
- 4. Are you fluent in written and verbal English (reading and writing)?
- 5. Are you caring for an aging loved one age 65+ with a cognitive or memory impairment?
- 6. Does your loved one live in a residential dwelling (they may live alone or with a family member)?

Anyone that meets the above requirements can participate so please share this to any caregivers who may benefit!

Thank you for your continued support! #endALZ

Warm Regards,

--
